

SANYO

Digital Video Recorder With Built-in QUAD Compressor

- Two-week nonstop recording at 30 frames/sec
- With 4ch in/out terminals for a 4-screen display
- Exclusive in/out terminals for audio recording and playback
- Side-by-side installation in a 19" rack
- Remote surveillance and operation via network

TWO-WEEK NONSTOP RECORDING

Made in Japan

The product introduced here is manufactured in Japan
utilizing advanced technologies and quality control.

The image shows the front panel of a Sanyo digital video recorder. The panel is dark grey or black. At the top left, the 'SANYO' logo is printed in white. To the right of the logo, the text 'DIGITAL VIDEO RECORDER FOR HD' is visible. Below the logo, there are four red buttons labeled 1, 2, 3, and 4. To the left of these buttons is a red 'POWER' button. To the right of the numbered buttons are several other controls: a 'MENU' button, a 'RECALL' button with a double left arrow, a 'PAUSE' button with a double vertical bar, a 'SKIP' button with a double right arrow, and an 'EXIT/ON' button. Below these are two more buttons: 'RECALL' and a red 'STOP' button. To the right of the 'STOP' button is a 'VCR' button. On the far right, there is a 'VCR' button and a 'VCR' button. At the bottom right, there is a 'DIGITAL' logo and the text 'HD VIDEO RECORDER'. The panel also features a small display screen in the center, which is currently blank.

DSR-M804 comes with a built-in motion sensor. Different settings can be made for each camera image independently. The sensor can detect moving objects within the screen by picking up changes in brightness. The user can use this feature to trigger an alarm recording.

Rear View

Audio input terminals
Audio output terminal
Microphone input terminal

The device sends out clear sound and receives inputs from external devices.

100Base-TX / 10Base-T Ethernet terminal
Standard connection to PCs and HUB.
Camera input terminals
Camera output terminals
Switching between NTSC / PAL is possible.

Various Playback Functions

DSR-M804 features six playback functions: Playback, Still, Cue / Review (7.5x to 180x), Frame advance, Slow (1/8 to 1/2, forward and backward), and Search.

4-Screen Display

The unit is capable of displaying video images from four cameras on one monitor by splitting the screen. A full-screen display, either by using the sequential switching function or designating a channel, is also possible. In addition, a separate display setting is available for exclusive use at the time an alarm is triggered.

4-screen display

Full-screen

Search Functions

The two search functions — "Alarm search" and "Date / time search" — call up desired images instantly.

Alarm search

Recorded alarm images are retrieved from a list of alarm events and played back.

Time/date search

The user can designate time and date of recorded video images and play back retrieved images.

Security Lock

There are two levels of security lock — Administrators and Users. — offering users the best option for their security needs.

Buzzer

Depending on the user's preference, the unit can be setup to emit a warning buzzer when (1) there is an alarm; (2) HDD becomes full; (3) recording suddenly stops; (4) an abnormality occurs; (5) an operation button is pressed.

TV-System Switching between NTSC / PAL

A changeover switch in the back directs video signals of surveillance camera input / monitor output to NTSC or PAL circuit. (Note: this switch only route the video signal to an appropriate circuit and does not mean that the unit converts a NTSC input to PAL format, or vice versa.) Also, the AC power source is for 120 to 240V.

Other Features

- 30-day memory back-up
- Resume function
- End-of-medium alarm
- On-screen mode setting, menu languages built in: English / French / Spanish
- Built-in time date generator

This compact DVR excels in networking and expandability.

Built-in USB Terminal

The unit has a built-in USB terminal in the front. A CF card reader* allows the user to upload / download menu items and set up other DSR-M804 units.

*For a validated CF reader, consult www.sanyosecurity.com.

Built-in RS-485 Terminals

The unit has built-in RS-485 terminals for SSP (SANYO Security Serial Protocol) usage. Separately sold system controller VSP-8000 can control up to 128 units of DSR-M804.

Built-in Control Terminals

These terminals make it possible to control the DSR-M804 using Resistive Ladder Remote Controller.

Also Comes with a LAN Terminal

There is a built-in 100Base-TX / 10-Base-T LAN terminal, allowing remote surveillance / control from PC via LAN with the DVR Utility Software.

DVR Utility Software for DSR-M804

VA-SW80LITE software is included in the product package. By installing this software on a PC, it will be possible to connect the PC and DVRs over a LAN and monitor live video or control DVRs on the PC.

System environment

	Multi Monitoring	Single Monitoring
System	IBM PC / AT or Compatible	
CPU*1	Pentium® 4 3GHz or faster	Pentium® III 800MHz
Memory	256MB	
Interface	100Base TX, USB(1.1)	
Display	XGA (1,024 x 768 pixel), 16-million color or greater AGP graphics card or graphic chipset with hardware overlay support*2	
Sound	Audio subsystem that supports up to 48Khz (or greater) stereo playback*3	
OS	Windows® XP Professional	

*1 For multiple split-screen monitoring, CPU clock frequency of 750MHz is required per screen.

*2 Driver software that is compatible with DirectX8.1 must be installed.

*3 If a sound card is not installed, the sound which is recorded in "AUDIO RECORDING ON" mode cannot be played back.

A high-end software package VA-SW804 is also available (sold separately).

- Auto repeat recording
- Alarm counter
- Automatic daylight saving time adjustment
- Lifetime counter
- Through output of video
- Push-lock terminals for easy installation (refer to the rear panel photo)

Remote surveillance/control available

DVR Utility Software VA-SW804 (sold separately)

By installing VA-SW804, the user can build a remote surveillance system that links DVRs and PCs via a LAN. In addition to features included in VA-SW80LITE, one can realize simultaneous upload of timer and menu settings to multiple units of DSR-M804 and DSR-M800 that are connected in series, plus data alteration detection for verifying the authenticity of data. Also included is the Multi-Monitor feature that makes it possible to display images from several DSR-M804/DSR-M800 units (max. four units) on one PC monitor. Complete security is provided by ID-password protection with four-levels of accessibility.

System environment

	Multi Monitoring	Single Monitoring
System	IBM PC / AT or Compatible

Sound	Audio subsystem that supports up to 48Khz (or greater) stereo playback*3	
OS	Windows®XP Professional	

*1 For multiple split-screen monitoring, CPU clock frequency of 750MHz is required per screen.

*2 Driver software that is compatible with DirectX8.1 must be installed.

*3 If a sound card is not installed, the sound which is recorded in 'AUDIO RECORDING ON' mode cannot be played back.

DSR-M804

(Unit: mm)

MODEL	DSR-M804
General	
Hard disk capacity	120GB or 240GB (120GB x 2)
Picture resolution	NTSC: 720 x 480 (Super / High / Standard) PAL: 720 x 576 (Super / High / Standard)
Compression	MPEG2 (Video), MPEG1 Audio layer2 (Audio)
Picture quality	3 levels (Super / High / Standard)
Recording type	Frame
Recording speed	NTSC: 30 frames/sec PAL: 25 frames/sec
Screen display	1-screen display / 4-screen display
Number of cameras	4
Menu language	English / French / Spanish
Clock setup	Month / Day / Year / Hour / Minute / Second
Signal format	NTSC / PAL color signal standard (Switchable)
Play back	Playback / Still / Search / Cue / Review / Frame advance / Slow
Search mode	Time/date search Search by time and date
Alarm search	Search by alarm event list
Video	
Video input	1.0 V p-p / 75 Ω unbalanced (BNC x 4)
Video output	1.0 V p-p / 75 Ω unbalanced (BNC x 4)
Monitor output	1.0 V p-p / 75 Ω unbalanced (BNC x 1)
Audio	
Audio input	-8db, 27 kΩ unbalanced (RCA pin jack x 4)
Audio output	-8db, 600 Ω unbalanced (RCA pin jack)
Microphone input	-60db, 10 kΩ unbalanced (3.5mm mini jack)
Interface	
LAN terminal	100BASE-TX / 10BASE-T (RJ-45)
USB terminal	For CompactFlash reader (Front)
Control signal	
RS-485	3 terminals: A / B / GND
Remote control in	External switch connection
Clock adjust input	Normal open, Low level active
Clock adjust output	Normal 5 V, Low level active
Non REC output	Normal 5 V, Low level active
Alarm input	Normal open, Low level active x 4
Alarm output	Normal 5 V, Low level active
Alarm reset input	Normal open, Low level active
Warning output	Open collector (500mA), Low level active
Full output warning	Open collector (50mA), Low level active
Series REC input	Normal open, Low level active
Series REC output	Normal 5 V, Low level active
Electrical	
Power source	120 V to 240 V AC, 50 / 60 Hz
Current consumption	480mA - 300mA
Physical	
Operating conditions	Temperature: 5°C to 40°C [41°F to 104°F], Humidity: 10% to 80%
Dimensions (W x H x D)	210 (W) x 96 (H) x 380 (D) mm [8.27(W) x 3.78(H) x 14.96(D) in.]
Weight (approx.)	3.7Kg [8.2 lbs.]

*Specifications subject to change without notice

Warnings regarding HDDs

- Do not attempt to install or replace a HDD on your own. You cannot use these HDDs on PCs.
- The unit may be damaged if it is exposed to an impact or vibration, or the power plug is disconnected during operation.
- SANYO will not be held liable for any data loss due to an HDD error or a failure during recording.
